

## Vehicle Testing

- GETEC Getriebe Technik GmbH is an independent engineering service provider focusing on the powertrain development. We provide multiple services for different types of calibration and application tasks. Whether on the PC, on the test bench or on the road, there is always an optimal solution for our customers.
- Situated near the Aldenhoven Testing Center, GETEC Getriebe Technik GmbH is able to provide a wide spectrum of real life conditions for extensive vehicle testing.

## Service

Our vehicle testing services focus on following segments:

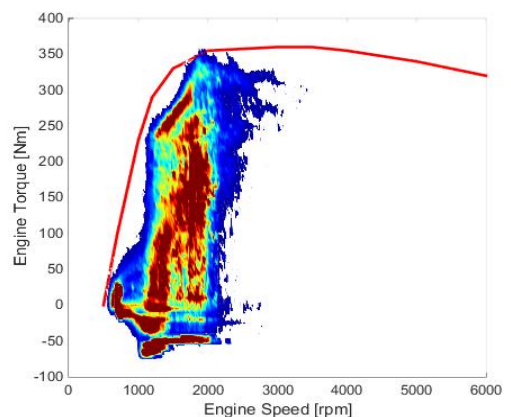

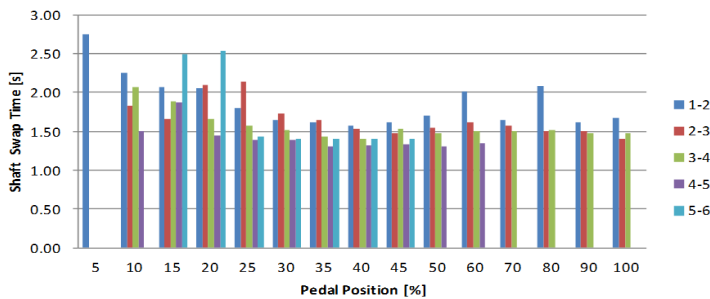

- Complete system test
- Vehicle performance test
- Shift evaluation
- ECU calibration
- Fuel consumption test
- Vehicle durability test
- NVH test
- Cold climate test (CCT)
- Hot environment test (HET)
- High altitude test (HAT)
- Up- and down-slope test
- Special tests based on customers' requirement

## Data Assessment

Our calibration engineers have gained great experiences on vehicle testing. With standardized and special tools, the data is collected during drive, analyzed and summarized for customers' feedback.
